

VI - SOLVE THE YELLOW CORNERS

**YOUR
GOAL**

1. Look around the cube in the top row to find any two corners of the same color on the same side.

2. Hold the cube so that the side with those corners is the BACK side. If there is no side with two identical corner colors, any side can be the BACK side.

3. Perform the following algorithm repeatedly until the top corners are in place:

4. You may need to flip the UP face after performing the algorithm to put the corners in the correct positions.

5. Congratulations!
Only 1 step left!
